

COURSE DESCRIPTION

These courses are being offered and conducted by experienced and qualified dentists in conjunction with dental university oversight. They are designed to provide dentists with a practical hands-on live surgery allowing the participants to gain more confidence in their skills and techniques. Surgical guides will be part of our protocol to make your surgeries a positive experience.

The participant will be placing a minimum of 18 implants within 3 sessions, this number could be greater or less depending on indications.

Overall, this hands-on course gives the opportunity to attain practical experience in surgery and treatment planning. Attendees and instructors will review each case before surgery using Digital Panoramic, 3D Imaging, Study Models and Photos. There will also be an opportunity to consult with the University Prosthodontics about the different approaches for final restorations.

DAY 1 - DAY 2 - DAY 3 (8:30 am- 2:30 pm)

- Case Presentation by Participants
- Digital Panoramic & Cone beam CT Implant Planning
- Selection of patient's fixtures and an overview on implant procedures
- LIVE SURGERY: each participant will place a minimum of 6 implants

Surgery will be performed by attending doctors and supervised by Course directors & Faculty members.

REQUIREMENTS

- Basic Dental Implant Training (contact dr. Carranza for basic courses)
- Basic Knowledge on Oral Surgery
- Basic Knowledge in dental implant Instrumentation
- Minimum of 3 years in general dental practice

The courses are based on collaboration between various Implants companies and the Universidad Científica del Sur, Lima Peru.

Join us to learn, enjoy the best food, and tour one of the seven wonders!
